Specifics

Table includes all records of Australian administered COVID-19 AstraZeneca Vaxzevria vaccinations recorded in the Australian Immunisation Register as at 26 October 2022 11:59 PM. A small number of events may have occurred that have not yet been reported due to delays in recording events by Immunisation providers.

The Australian Administration numbers counts the number of dose events recorded in the Australian Immunisation Register, not the number of individuals vaccinated.

Australian Administrations includes doses administered by providers in Australia on or after the 21st February 2021. A small number of overseas administrations may be counted in this category where reported via a prescribed body directly.
